OBJECTIVE: To work as a Front-End Web developer, developing sites and applications using any combination of the following web technologies: HTML5, CSS3, Angular 1.x/2, jQuery/JavaScript, Backbone.js, Node.js, RESTful APIs, responsive web design; to enjoy my work with an organization that prides itself on using forward-thinking practices.

SKILLS

Angular 2	Angular 1.x	JavaScript	Backbone.js
Underscore.js	jQuery	HTML5	CSS3
Bootstrap	Node.js	RESTful APIs	AJAX
Agile/Scrum Development	Chart.js	Meteor	

WORK EXPERIENCE

Front End Web Developer
Shoeboxed Inc | Durham, NC   03/2016 - Present

- Lead Front End developer for the company's newest expense reporting application, Fetch.
- Created the new responsive single page application (Fetch) using a combination of Angular 2, HTML5, CSS3 and Bootstrap.
- Developed the reporting functionality for Fetch that allows users to be able to filter through all of their expenses quickly and efficiently.
- Enhanced the reporting on the main Shoeboxed application to better suit user needs by adding direct download functionality among other filtering improvements.
- Integrated Facebook and Google SSO into the existing Brandloop application to enhance user experience and provide better information about the user to the company.

Angular 2   Backbone.js   HTML5   CSS3   Node.js   RESTful APIs   Underscore.js   jQuery
Agile/Scrum Development

Front End Software Developer
Jellyfish Health | Panama City, FL   01/2015 - 02/2016

- Built the main Patient Access application using Angular 1.x and Bootstrap to create a responsive SPA.
- Created a user friendly dashboard that displayed both live and historical data to the physicians and medical staff.
- Designed and developed the waiting room displays used in clinic waiting rooms to show the progression of patients.
- Developed the responsive kiosk application used by patients to be able to quickly check in for their appointments.

College Program Intern
The Walt Disney Company | Lake Buena Vista, FL   05/2014 - 10/2014

- Worked full time with some of the attractions at the Magic Kingdom.
- Involved in knowing the day to day operations and making sure that the attractions were operating safely.
- Toured and studied the technology that goes into each ride at the park.
- Took classes and attended seminars offered by The Walt Disney Company to help start my career.

EDUCATION

Meteorology/Math

Valparaiso University | Valparaiso, IN   05/2013 - GPA: 3.5

- Served as President and was the founder of the Indiana Iota chapter of Phi Delta Theta.
- Organized and participated in events to raise money/awareness for ALS

PROJECTS

Honduras Mobile Healthcare

Lead Developer   Ongoing

Currently working on a project in my spare time that will provide mobile healthcare to remote areas of Honduras. The software I have developed using MEAN stack centralizes all of the data from remote areas into a single database.
